# Product Catalogue

DFX Technologies is a leading manufacturers of wireless water level controller and indicators. Most of the products aim is to avoid water seepage, power and time savings. Aquapro+ is the wireless water level controller which control the over flow in the OHT tank and automatic controller of the pump motor. We have both wired and wireless technologies to establish the product in new manner. It also mostly used in the RO water purification, water treatment plant and various types of liquid level controls and indicators.

- Features:**
- Wire-Free Technology
  - Polypropylene Sensors
  - IP 54 ABS Materials
  - Micro Controller Based
  - Dry-Run Protection
  - Intelligent Power Saving
  - Fully Automatically
  - FCC Free Band
  - Auto Error Identification

**Applications:**

House, Apartments, Hospital, Company, Industries, Shopping Mall, Agriculture etc.,

**Specification:**

Tank Unit Supply : 230V AC/50Hz  
 : 12V/7Ah-25W SPV (OP)  
 Control Unit Supply : 230V AC/50Hz  
 : 440V AC/50Hz (OP)  
 Sensor Voltage : 5V DC/100mA
