

MICROWAVE MOTION SENSOR

Innovation to the best...

DFX TECHNOLOGIES

NANO I6

3 - 2000LUX

1-8m

10sec - 12min

INCANDESCENT: 800W
LED LO. AD: 300W

Height 1.5-3.5M

WHY MICROWAVE MOTION SENSOR?

- Activated by the slightest motion and speed
- Wide detection range
- Detects motion through plastic, false ceilings, glass, and thin non-metal materials
- Energy-efficient
- Detects motion from -20 C to +60 C

Leading the
way to a smart &
energy-efficient
life

POTENTIAL Savings

THROUGH MOTION SENSORS

Corridors
up t o 90%

Offices
30-60%

Parkings
50-80%

Meeting rooms
up t o 90%

Stair cases
up t o 90%

APPLICATIONS

Malls & Offices

Parking Areas

WHY PIR MOTION SENSOR?

- Reliably detects motion especially under controlled temperature
- Saves energy
- Perfect for compact premises
- Not detectable through glass
- Unwanted area of detection can be masked
- Financial savings

SAVING UP TO 60% OF THE ENERGY IS NOW POSSIBLE WITH
PIR MOTION SENSOR
